Intel® Teach Program – Master Level Courses

Research-Proven Professional Development for K-12 Classroom Teachers
- Do teachers come to you for advice on integrating technology into their curriculum?
- Are you proficient using software, e-mail, and the Internet for instruction?
- Will your district/organization support you as a leader of technology professional development?

You're ready to be a Master Instructor!

Build Effective Technology Integration Skills and Promote 21st Century Learning:
You'll receive free, comprehensive instruction, facilitation support, and curriculum review by a certified Senior Trainer to prepare you to recruit and deliver the course to teachers in your area. Master Instructors typically invest 40 to 60 hours per course (face-to-face facilitation and out-of-class "homework").

Master Instructors Commit to Deliver the Course to at least 10 Teachers
All materials to instruct your colleagues will be provided to you at no charge. You'll recruit participants and deliver the training (32 to 60 hours, depending on the course).

To participate, find your Intel Teach Affiliate and LEA

Intel® Teach Essentials Course

Integrate technology and project-based approaches into existing classroom curricula to promote student-centered learning and 21st century skills

As an Intel® Teach **Master Instructor**, with instruction from a Senior Instructor, you'll support your peers to:

- Learn effective ways to create assessment tools using a library of resources

- Engage students with project-based learning approaches and innovative uses of Web 2.0 technologies

- Create a standards-based unit plan, support materials, and implementation strategies to improve and assess students' 21st century skills.

Free resources are available at www.intel.com/teachers

Intel® Education Assessing Projects
Create assessments by searching, selecting, and modifying examples from a library of assessments of 21st century skills.

Intel® Education Help Guide
Find step-by-step instructions for hundreds of technical skills for commonly used software applications.

Web 2.0 Resources
Use online tools to support communication, encourage student collaboration, and organize Internet resources.
