## Your Test is *Creating* The Ultimate Test!

Your task is to create a test on force, motion, and energy concepts. Follow the directions below and read the scoring rubric (how you will be graded). Your questions must be in multiple-choice format with A-D choices.

### Test Criteria

- **Your test must include 25 questions: 20 about force and motion concepts, and 5 questions on energy.** Your questions should be based on the activities we have done in class.
- Use pictures and diagrams in your questions or answers for at least 10 of the questions.
- Create an answer key on a separate sheet of paper.
- You must work independently.
- Be sure to choose what you think are the most important concepts as you write your questions.

55 points total	Exceeds Criteria	Meets Criteria	Does Not Meet Criteria	No Evidence
	<i>Exceeded expectations</i>	<i>Included all that was required</i>	<i>Missing some pieces</i>	<i>Provides little or no evidence</i>
Included 25 questions - (5 points)				
All questions are correctly stated with reasonable choices and one correct answer - (10 points)				
Used at least 10 pictures and diagrams to provide more meaning on questions and/or answers - (10 points)				
Important concepts selected - (5 points)				
Questions are at an appropriate difficulty level for 8th grade - (5 points)				
Questions and answers show depth of understanding of the concept by the test-writer (you) - (10 points)				
Provided answer key on separate sheet. - (5 points)				
Test is neat and readable. - (5 points)
