Design Evaluation of, *Avian Flu: Under the Microscope*

<http://library.thinkquest.org/05aug/01479/>

Here is our evaluation of the layout and design of a Web site. We analyzed the site as a team and each of us played a role of a web design team member. We each used our role to analyze the site and critique specific parts of the site. Here are our findings:

Effective	Ineffective
Informative movie opens Web site	Colors are not visually appealing
Easy to navigate	Text too small
Information well written and informative	Headings should be larger
All links work	All headings in same font as text
Pictures well chosen and enhance site	Background confusing on some pages
