Intel® Teach Program

Free Professional Development for Common Core Implementation

The **Intel® Teach Program** empowers teachers to use technology for common core and state standards implementation, engaging the problem solving, critical thinking, communication and collaboration skills students require for college and career-readiness in an information age.

Intel® Teach Elements' interactive content is designed for delivery entirely online or blended. A royalty-free license agreement enables local customization of course content to incorporate state standards and resources. Licensees may download course content for import into learning management systems.

Current Courses include:

Assessment in 21st Century Classrooms
Collaboration in the Digital Classroom
Educational Leadership in the 21st Century
Inquiry in the Science Classroom
Project-Based Approaches
Thinking Critically with Data

Intel Teach Affiliates receive:

- Consultation and assistance from Intel Teach National Training Agency grantees;
- Access to ITA meetings, webinars and events;
- An invitation for representatives to attend the annual ITA Summit;
- Access to the closed ITA online community;
- Access to Online Facilitator Training and support at no cost;
- Access to the online Intel Teach Elements Implementation Toolkit, providing resources for course customization, recruitment, delivery and evaluation

Intel Teach Affiliates provide:

- A primary contact;
- Sharing of locally developed resources and methods;
- Participation in ITA meetings, webinars and events;
- Reporting to Intel of numbers of participants;
- Localization of materials, local facilitators, and course facilitation;
- Delivery of courses;
- Participation in national program evaluation
