

Next Unit of Computing

Small. Efficient. Fast.

The Next Unit of Computing (NUC) family delivers stunning visuals and edge-of-your-seat performance in an ultra-small package. Powered by a visibly smart 3rd generation Intel® Core™ i3 processor on a 4-by-4-inch motherboard and enclosed in a tiny case, the NUC is big on performance yet surprisingly small in size. It's an ideal engine for digital signage, kiosks, home theater systems, and intelligent devices for small spaces, or anywhere else you can imagine.
