

Ron Kasabian
General Manager, Big Data Solutions
Intel Corporation

Ron Kasabian is general manager of Big Data Solutions for Intel's Datacenter and Connected Systems Group. He is responsible for strategy, products and technologies for big data and analytics solutions. Prior to this role, he was a senior member of the Intel IT Staff reporting to the CIO, responsible for enterprise solutions including business intelligence, analytics and big data.

Kasabian has over 28 years of experience delivering enterprise solutions and systems across a number of different domains including sales, marketing, distribution, planning, manufacturing, finance, procurement, sourcing and materials management.
