Intel-Powered Classmate PC Momentum Grows

June 21, 2011 – Since Intel announced the Intel-powered classmate PC reference design in 2007, more than **4 million Intel-powered classmate PCs have shipped globally**¹. Interest in the classmate PC continues to grow as more governments understand the value of a 1:1 computing environment and the value offered by the Intel® Learning Series and the classmate PC. More than 300 vendors of the Intel Learning Series are developing applications, peripherals and services optimized for Intel-powered classmate PCs. The Intel Learning Series includes hardware, operating system and software vendors as well as enterprise solutions providers from around the world.

The classmate PC has given many children around the world their first taste of computers and the Internet and has furthered computer literacy for students and teachers. Having access to a computer helps students develop 21st century workforce skills and be more competitive in the global economy. The Intel Learning Series helps schools worldwide with technology, digital educational content, professional teacher training and infrastructure for ongoing support.
