The Most Energy Intensive Sectors...

Delivered Energy Consumption by Sector

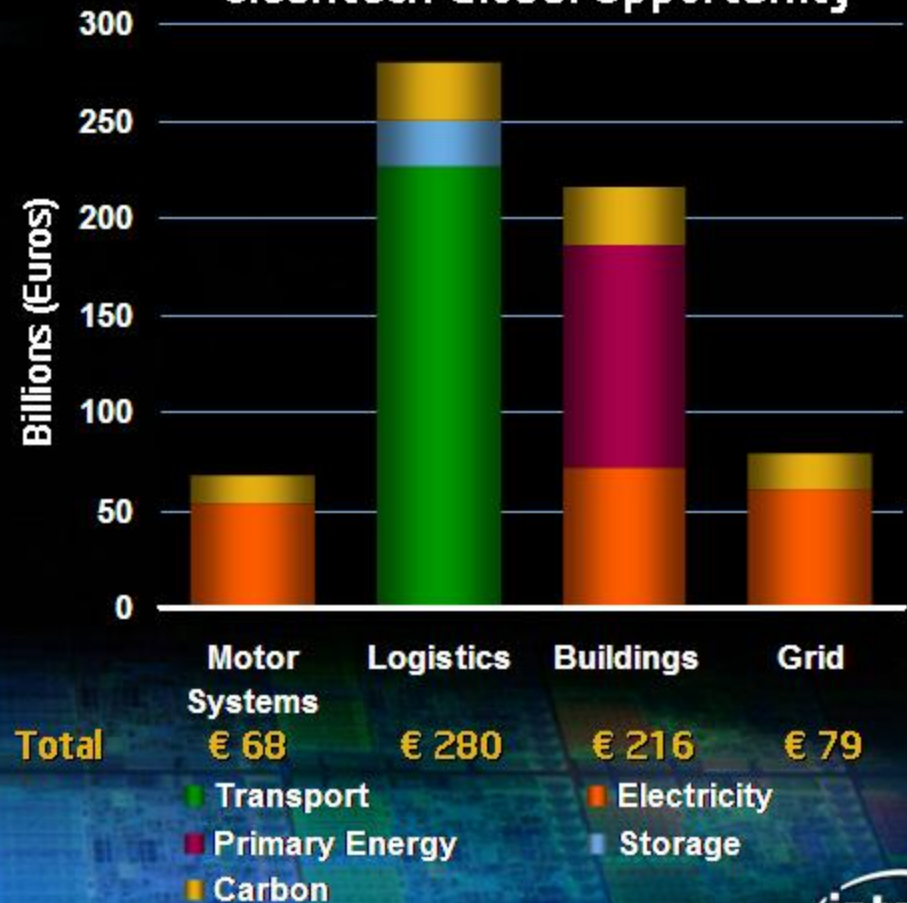

Source: EIA Annual Energy Outlook 2008

... Have Been the Least [Smart] IT-intensive

Company Segment	Percentage of Revenue Spent on IT
Media	8.2%
Professional Services	6.9%
Information Technology	6.9%
Financial Services	5.9%
Electronics	5.6%
Banking	5.6%
Pharmaceuticals	5.5%
Health Care	4.6%
Cross Industry	4.5%
Construction & Engineering	4.4%
Transportation	3.9%

Information and Communications Technology. Cleantech Global Opportunity

SMARTer Manufacturing: 3D Simulation Test and Refine the Product Before It's Real

Simulation

Analysis

Top performing manufacturers:

- Build ½ the number of physical prototypes
- Get product to market 58 days faster
- Have 48% lower prototyping costs

3D simulation a big untapped opportunity

Construction: 3D Simulation Building Information Management / Green

- US Buildings: 71% of total electricity consumption
 - Also 39% of energy consumption, 39% CO2 emissions, 36% of Greenhouse gases
- 3D is the big untapped opportunity

What is the world's largest annual movement of People.

Saudia Arabia, Mecca:
The Hajj = 3 Million People

United States:
Thanksgiving: 11 Million Travelers

China
Chunyun = 196 Million Passengers

China Railroads

- \$330 Billion Investment 2009-2011
- 3.2B Passengers in 2012
- 63,000 Train Cars (3500 new trains x 18 cars)*
- 25,600 miles of high speed track under construction
(greater than circumference of earth)
- 6000 total stations built
- 150,000 mobile workers

* Intel estimate

China Railroads

Energy savings per km (trains instead of cars)

Chunyun: 62.8 billion BTUs

Thanksgiving: 3.5 billion BTUs

Hajj: .96 billion BTUs

Carbon footprint decrease per kilometer (trains instead of cars)

Chunyun: 29k tons

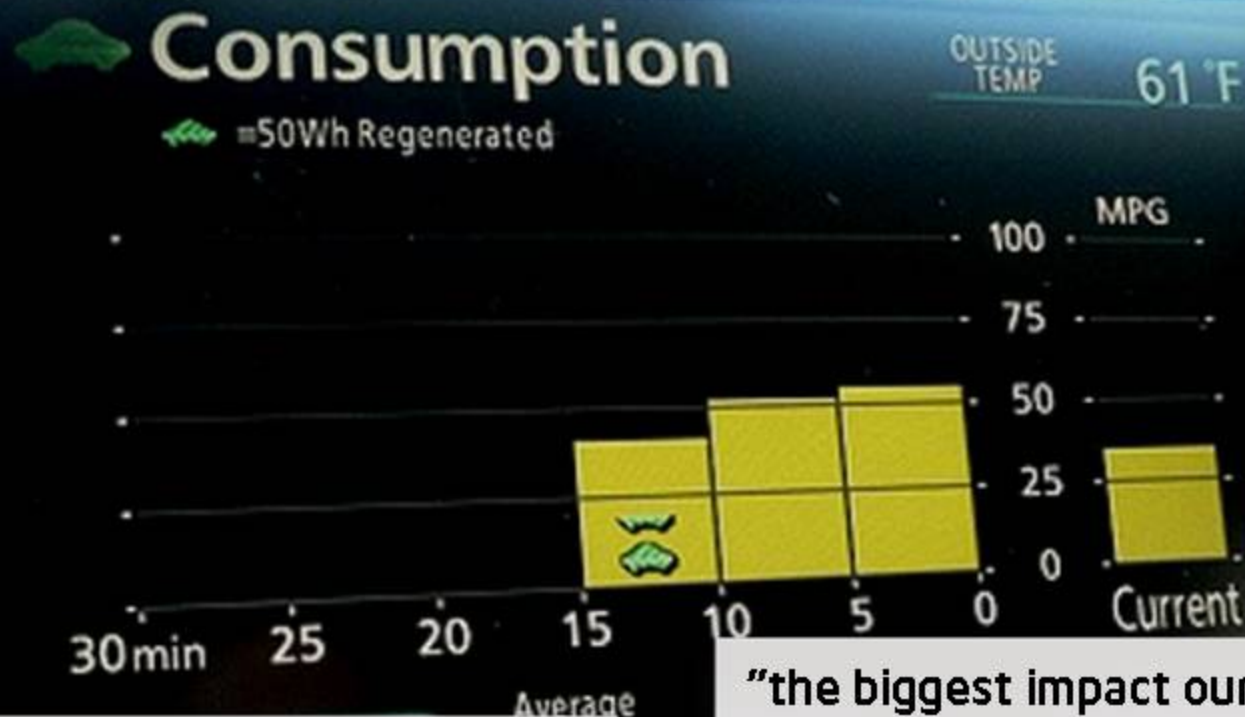

Thanksgiving: 1.6k tons

Hajj: 444 tons"

* Intel estimate

SMARTer Transportation: Consumer Empowerment

"If the EPA would mandate [fuel consumption displays] in every car, this country [USA] would save 20 percent on fuel overnight...."

Wayne Gerdes

"the biggest impact our having a Prius with its MPG feedback has had is to make our son a pretty careful driver. When I was a teenage driver, my focus was acceleration, his is efficiency."

Next Steps On SMARTer Transportation

- All relevant technology already exists
- In-vehicle technology has been extensively tested
- Communications equipment is available from many equipment suppliers
- The communication capability is waiting for government initiatives

Government Action On Regulation Required, It Needs to be a Priority

SMARTer Connectivity: Broadband

21st Century Infrastructure for Everyone

7% increment (US) → \$134B in Economic impact
2.35 million jobs created/saved
3.2 billion lbs of CO₂ / year

400 Million have it. 4B need it

Driving Down Cost and Crossing the Digital Divide

Incremental Cost At Introduction and Now
(US Dollars)

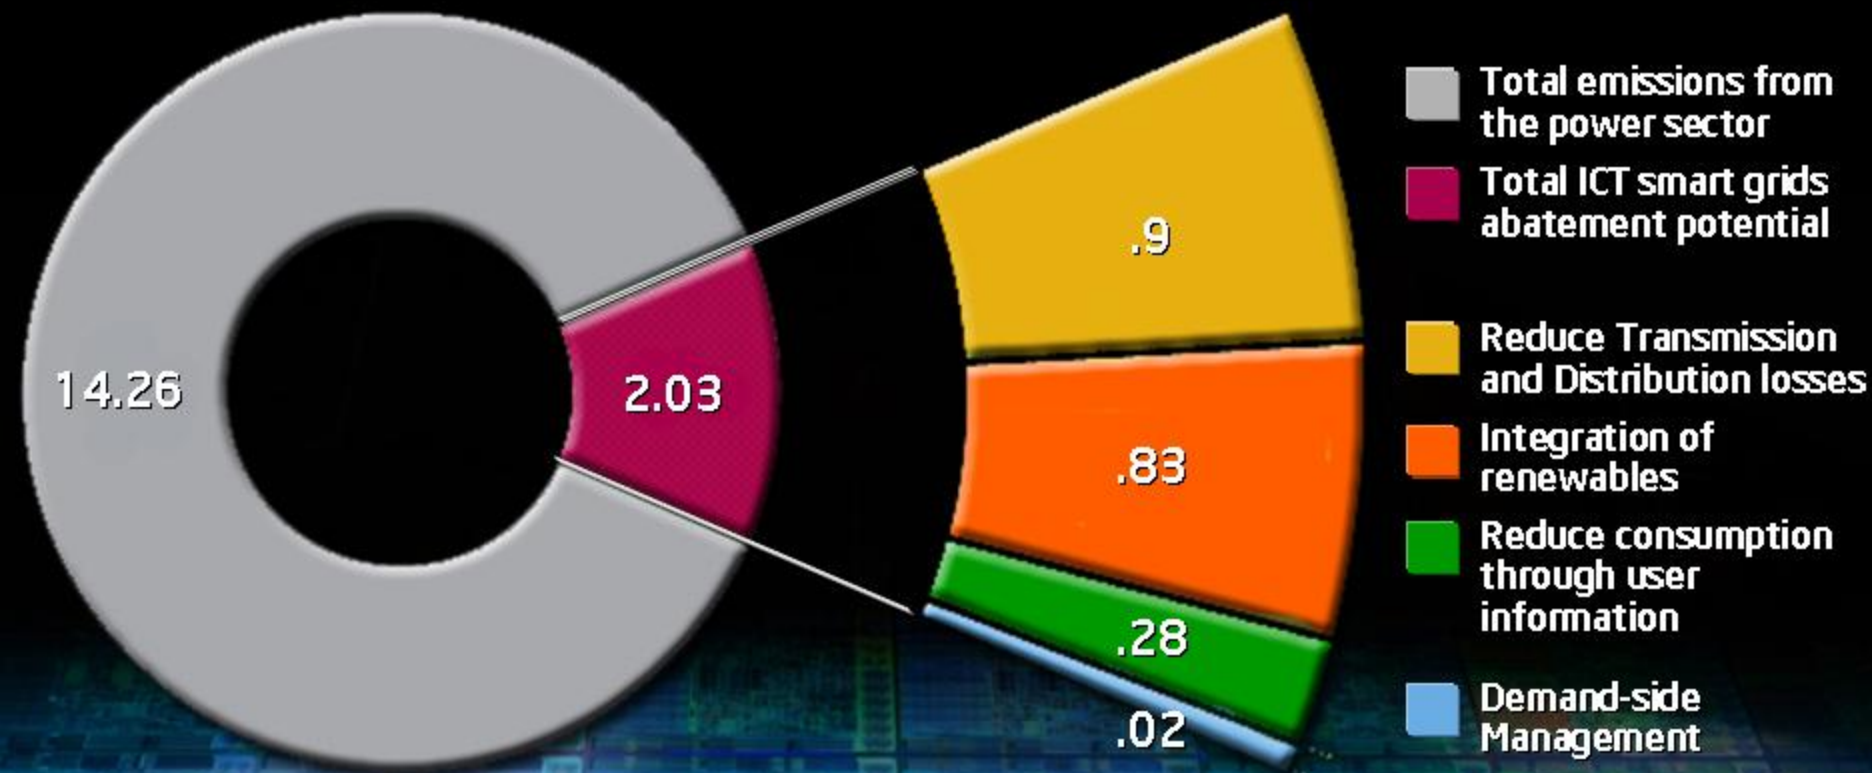

WiMAX Signal On Track To Reach 1 Billion People By 2012

What About Smart Energy?

*Potential for Information & Communication Technologies
to Reduce Carbon Emissions Through SMARTgrid*

Global Emissions Business-as-Usual
in 2020=51.9 GigaTons of CO₂ equivalents

**Money Alone Will Not Solve the Problem...
It Will Require Effective National Policy Leadership**

Apply Best Practices for Enabling Competition & Innovation

Open Interfaces & Defined Protocols

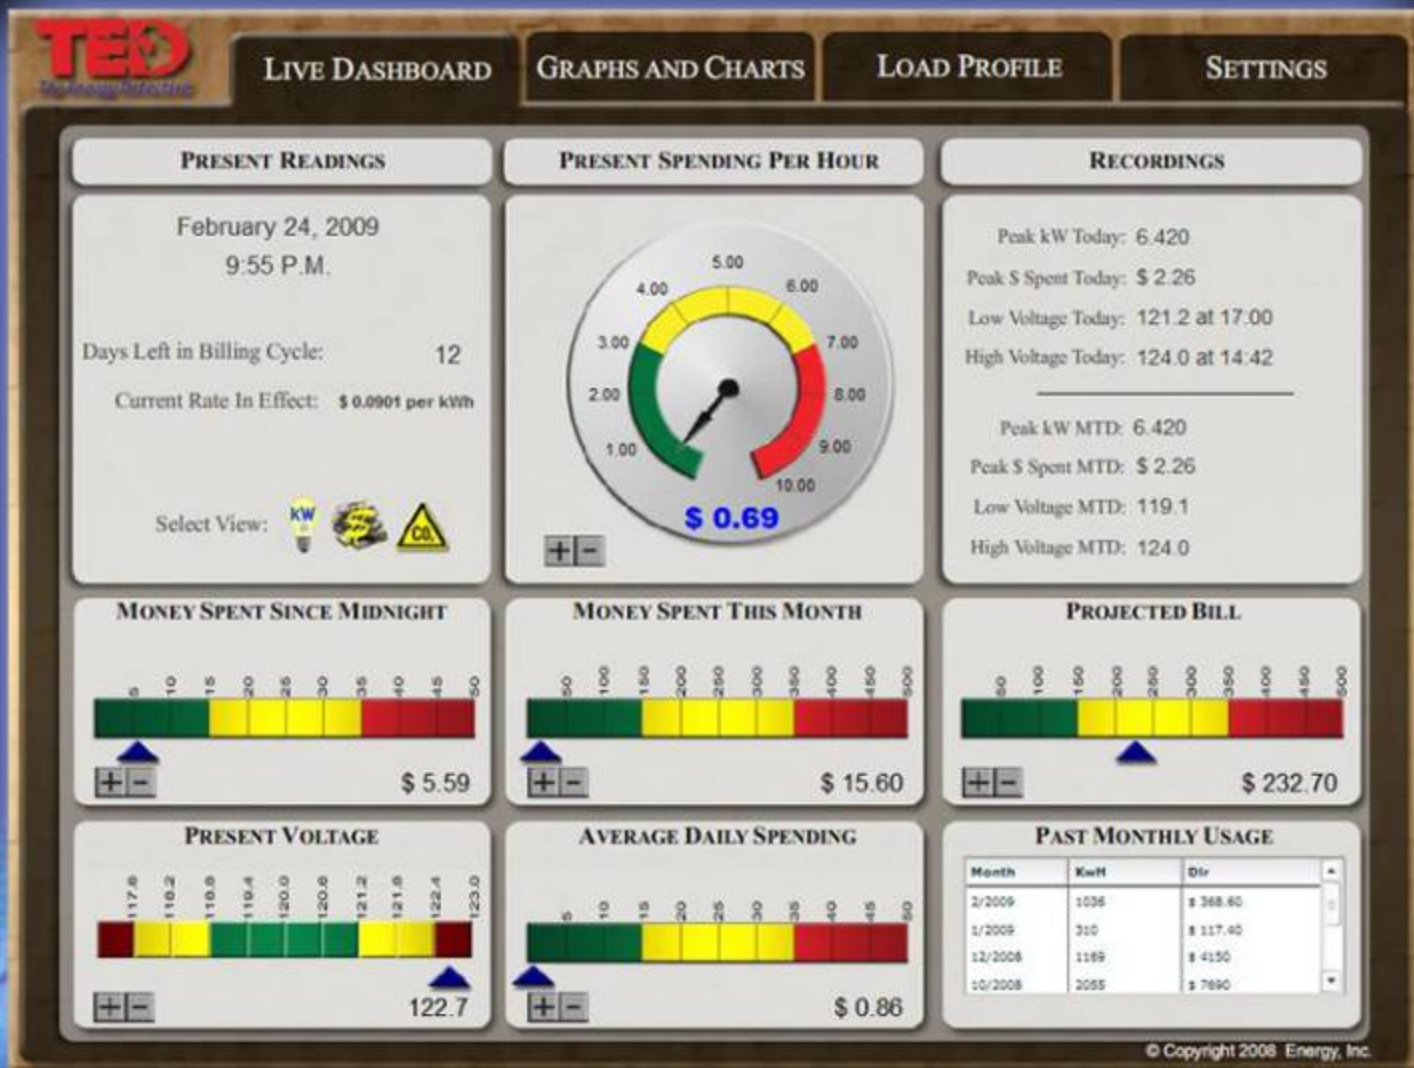

Examples:

**Building Energy Measurement & Management
Meter Communication
Renewable Integration Modeling**

kWh

Consumer Empowerment

Going Forward: Monitoring From TV

Intel is a Leader In Renewable Energy

Intel receives Green Power Leadership Award from EPA:

- Largest corporate purchaser of renewable energy in the U.S.
- ~47% of Intel's US purchased electricity comes from renewable sources

Intel site solar installations expanding quickly:

- Bangalore - solar water heaters now saving 70,000 kilowatt hours per year
- Oregon – office building electricity
- New Mexico - solar demonstration on benefits in data centers
