# 1. Introduction

---

This document provides users of the Intel® RAID Controller RS2PI008 and RS2PI008DE with a guide to the operating systems, server boards, chassis, disk drives, and other peripherals that Intel tested for use with this RAID controller.

This document will be updated as additional testing is performed, or until the Intel® RAID controller is no longer in production. Each new release of the document will include the information from previous releases.

Intel will only provide support for this RAID controller when it is installed in a system configured with the specified server boards, and when the server board is configured with the tested RAID firmware, system BIOS / firmware, and operating system versions.

This RAID controller was thoroughly tested with Intel® server boards, Intel® drive enclosures, and the third-party devices listed in this document. However, it is not practical to test the RAID controller in every possible combination of server board, drive enclosure, hard drive, and peripheral device. Sample combinations have been tested to gain confidence in their compatibility, and the devices listed were tested in one or more configurations.

## 1.1 Test Overview

Testing performed on the Intel® RAID Controller RS2PI008 and RS2PI008DE is classified under two categories:

- Compatibility Testing
- Stress Testing

### 1.1.1 Basic Compatibility Testing

Compatibility testing is performed with each supported operating system. Basic installation testing validates that the RAID controller can be used to install the operating system and that the base hardware feature set is functional. A small set of peripherals are used for installation purposes only. Additional add-in cards are not tested.

---

**Note:** *The latest version of an operating system signifies the latest supported version at the time of testing. New releases of this document may include a newly supported release of an operating system. Previous releases of a supported operating system may not be tested beyond the basic compatibility test process.*

---

#### 1.1.1.1 Support Commitment for Basic Installation Testing

Intel commits to the following level of customer support for operating systems that receive only basic installation testing:

- Intel will provide tested operating system drivers for each of the integrated controllers on the server board, provided the controller vendor has a driver available. Intel does not require vendors to develop drivers for operating systems that they do not already support. This may limit the functionality of certain server board integrated controllers.

- Intel will provide support to customers who experience issues with the integrated controllers due to the installation or functionality of an operating system only if a driver is available.
- Intel does not provide support for issues related to the use of add-in adapters or peripherals installed in the server system with an operating system that received only basic installation testing.
- Support is defined as assistance provided to a customer in root causing an issue and determining an acceptable resolution to the operating system problem. The resolution may include, but is not limited to, on-board controller driver updates, engaging the vendor, BIOS changes, firmware changes, or determining an acceptable workaround for the issue with the customer.

### 1.1.2 Adapter / Peripheral Compatibility and Stress Testing

Adapter / Peripheral Compatibility and Stress testing is performed only on the most current release of a supported operating system available at the time of testing. The Adapter / Peripheral Compatibility and Stress testing process consists of three areas:

- **Base Platform:** Each base platform will successfully install a given operating system, successfully run a disk stress test, and successfully run a network stress test.
- **Adapter Compatibility:** Adapter compatibility validation (CV) testing uses test suites to gain an accurate view of how the server performs with a wide variety of adapters under the primary supported operating systems. These tests are designed to show hardware compatibility between the cards and the server platform and include functional testing only. CV testing does not include heavy stressing of the systems or the cards.
- **Stress Testing:** This test sequence uses configurations with add-in adapters installed in all available slots (depending on the chassis used), and runs for a minimum of 72 hours (three days) without injecting errors. Each configuration passes an installation test, a network/disk stress test, and tape backup test. Any fatal errors require a restart of the test.

#### 1.1.2.1 Support Commitment for Adapter / Peripheral Compatibility and Stress Testing

Intel will provide the following level of customer support for operating systems that receive Adapter / Peripheral Compatibility and Stress testing:

- Intel will provide support to customers who experience issues with tested operating systems involving the installation or functionality of the server board with or without the adapters and peripherals listed in this document as having been tested under the operating system.
- Support is defined as assistance provided to a customer in root causing an issue and determining an acceptable resolution to the problem. The resolution may include, but is not limited to, on-board controller driver updates, engaging the vendor, BIOS changes, firmware changes, or determining a workaround for the issue.
- Intel provides and tests operating system drivers for each on-board video, network, and storage controller.
- Intel enables vendors to provide driver support for add-in adapters using these operating systems.

- Intel will go through some of the steps to achieve certification to ensure its customers do not encounter problems. The actual certification is the responsibility of the customer.

---

**Note:** Intel does not provide a support commitment for operating systems, adapter cards, and peripherals not listed in this document. Intel will consider requests for support on a case-by-case basis.

---

## 1.2 Pass/Fail Test Criteria

For each operating system, adapter, and peripheral configuration, a test passes if specific criteria are met. Specific configurations with particular characteristics are addressed on a case-by-case basis. In general, a configuration passes testing if the following conditions are met:

- The operating system installed without error.
  - Manufacturer's installation instructions or Intel's best-known methods were used for the operating system installation.
  - No extraordinary workarounds were required during the operating system installation.
  - The server system behaved as expected during and after the operating system installation.
  - Application software installed and executed normally.
- Hardware compatibility tests ran to completion without error.
- Test software suites executed successfully:
  - Test and data files were created in the correct directories without error.
  - Files copied from the client to the server and back match the original without error.
  - Clients remain connected to the server system.
  - Industry-standard test suites run to completion without error.

## 2. Firmware Configurations

---

The following table lists the tested controller and firmware configurations. This document will be updated with additional configurations as new revisions of the Intel® RAID Controller RS2PI008 and RS2PI008DE or firmware versions for that controller are released. Each configuration is assigned an identifier number which is referenced in the tables throughout this document.

---

**Note:** Intel only provides support for adapters and peripherals in the configuration with which they were tested.

---

Base System Identifier #	Product Code	Part Number	Firmware Revision	HWR Revision
1	RS2PI008	903492	Ver.2.0.03-0673	
2	RS2PI008	903492	Ver.2.40.03-0787	
3	RS2PI008	903492	Ver.2.70.03-0862	
4	RS2PI008DE	904919	Ver.2.70.03-0862	
5	RS2PI008	903492	Ver.2.120.13-1094	B3
6	RS2PI008DE	904919	Ver.2.120.13-1094	B3

### 3. Operating Systems

The following table provides a list of supported operating systems for the Intel® RAID Controller RS2PI008 and RS2PI008DE. Each operating system was tested for compatibility with Intel® RAID Controller RS2PI008 and RS2PI008DE configuration listed in Chapter 2. Operating systems are only supported in the specified base system configuration(s) with which they were tested.

The following table also indicates whether each operating system received Basic Installation testing, or Adapter / Peripheral Compatibility and Stress testing. For information on the support commitments for Basic Installation Testing and Adapter / Peripheral Compatibility and Stress Testing, see Chapter 1.

Any variations to the standard operating system installation process are documented in the Installation Guidelines section of this document. If the installation guidelines are not noted in the following table, then the operating system installed as expected using the manufacturer's installation instructions or Intel's best-known methods.

**Note:** The operating systems listed in the following table have been tested for compatibility with the Intel® RAID Controller RS2PI008 and RS2PI008DE, but the operating system and its associated driver may not have been tested for compatibility with the server board you have selected. Refer to the supported operating system list for your server board to verify operating system compatibility with the server board. This document lists testing performed on Intel® Server Boards only.

Ident#	Operating System	Base System Configuration Tested – Type of Testing
1	Microsoft Windows 2003* SP2	Configuration 1,2,3,4,5,6 – Compatibility and Stress
2	Microsoft Windows 2003* SP2, x64	Configuration 1,2,3,4,5,6 – Compatibility and Stress
3	Microsoft Windows XP*	Configuration 1 – Compatibility only
4	Microsoft Windows XP*, x64	Configuration 1 – Compatibility only
5	Microsoft Windows Vista*	Configuration 1,2,3,4,5,6 – Compatibility and Stress
6	Microsoft Windows Vista*, x64	Configuration 1,2,3,4,5,6 – Compatibility and Stress
7	Microsoft Windows 2008*	Configuration 1,2,3,4,5,6 – Compatibility and Stress
8	Microsoft Windows 2008*, x64	Configuration 1,2,3,4,5,6 – Compatibility and Stress
9	Red Hat* Enterprise Linux ES 4.0 U7	Configuration 1,2,3,4,5,6 – Compatibility and Stress
10	Red Hat* Enterprise Linux ES 4.0 U7, x86_64	Configuration 1,2,3,4,5,6 – Compatibility and Stress
11	Red Hat* Enterprise Linux ES 5.0 U3	Configuration 1,2,3,4,5,6 – Compatibility and Stress
12	Red Hat* Enterprise Linux ES 5.0 U3, x86_64	Configuration 1,2,3,4,5,6 – Compatibility and Stress
13	SuSE* Linux Enterprise Server 9.0 SP4	Configuration 1,2,3,4,5,6 – Compatibility and Stress
14	SuSE* Linux Enterprise Server 9.0 SP4, x86_64	Configuration 1,2,3,4,5,6 – Compatibility and Stress
15	SuSE* Linux Enterprise Server 10.0 SP2	Configuration 1,2,3,4,5,6 – Compatibility and Stress
16	SuSE* Linux Enterprise Server 10.0 SP2, x86_64	Configuration 1,2,3,4,5,6 – Compatibility and Stress

Ident#	Operating System	Base System Configuration Tested – Type of Testing
17	SuSE* Linux Enterprise Server 11.0	Configuration 1,2,3,4,5,6 – Compatibility and Stress
18	SuSE* Linux Enterprise Server 11.0 x86_64	Configuration 1,2,3,4,5,6 – Compatibility and Stress

### 3.1 Operating System Certifications

The following table lists the operating systems that Intel will certify with the Intel® RAID Controller RS2PI008 and RS2PI008DE. Each customer is responsible for their own certification from the individual operating system vendors. In many cases, customers may leverage their operating system certifications from the testing completed by Intel. See the “Comments” column next to each operating system in the following table for additional information. Intel’s certifications, pre-certification, and operating system testing may help reduce some of the risk in achieving customer certifications with the operating system vendors.

Operating System	Certification Listing	Comments
Microsoft Windows 2003 Enterprise Server*	Intel® RAID Controller RS2PI008 and RS2PI008DE	OEM must request certification by Microsoft for their specific product. <a href="http://www.microsoft.com/whdc/hcl/default.aspx">http://www.microsoft.com/whdc/hcl/default.aspx</a>
Microsoft Windows 2008 Enterprise Server*	Intel® RAID Controller RS2PI008 and RS2PI008DE	OEM must request certification by Microsoft for their specific product. <a href="http://www.microsoft.com/whdc/hcl/default.aspx">http://www.microsoft.com/whdc/hcl/default.aspx</a>

## 4. Supported Server Boards

### 4.1 Intel® Server Boards

Below list includes the Intel® Server Board software versions that the server boards were configured with at the time of testing.

Intel® Server Board	BIOS	BMC	FRU/SDR	HSC
S5000PSL / S5000XSL / S5000XVN	R0101	66	48	2.14
S5000VSA	R0101	65	43	2.14
S5000PAL/S5000XAL	R0101	68	48	2.15
S5520UR	R0054	R0054	24	2.16
S5500WB	R0054	R0054	15	N/A
S5500BC	R0054	R0054	21	2.16
S5520HC / S5500HCV / S5520SC	R0054	R0054	28	2.16
S7000FC4UR	R0033	23	18	2.10
S3420GP	R0047	R0123	18	N/A

### 4.2 3<sup>rd</sup> Party Server Boards

Unless specifically noted, the boards below were configured with the latest software versions available at the time of testing. Check with the 3rd party vendors for more details.

Part Number	System BIOS	Vendor
X6DH8	6.1	Super Micro*
X8SAX	1.0a	Super Micro*
H8DCE	AMI. Ver.080012	Super Micro*
X6DHE	6	Super Micro*
X6DH8-G	6	Super Micro*
xSeries 3200	1.41	IBM*
xSeries 3200 M2	1	IBM*
xSeries 3250 M2	1	IBM*
xSeries 3350	1.37	IBM*
xSeries 3550	T22	IBM*
xSeries 3550	1.37	IBM*
xSeries 3650 M2	1.02 Build	IBM*
xSeries 3950	1.11	IBM*
S4881G2NR	4.0 Rev 6.1	Tyan*
Transport GT24	AMI 2.3.1	Tyan*
S5396	1.0.1.5396	Tyan*
S5360G2NR	1.4	Tyan*
S7010AGM2NRF	3.00	Tyan*
S7002G2NR-LE	1.07	Tyan*
S7012GM4NR	2.3	Tyan*
5YASV-RH	1.0.0029	Gigabyte Tech*

---

## 5. Enclosures, PCI Adapters, and Peripherals

---

The testing of enclosures, add-in cards, and peripherals was performed on the Intel® RAID Controller RS2PI008 and RS2PI008DE by Intel labs, independent test labs, or the vendor. Compatibility and stress testing was performed with the latest version of an operating system available at the time of testing.

Although a large sample of configurations were tested, not all devices were tested under all operating systems, and not all possible combinations or configurations of third-party devices were tested for inter-compatibility due to the large number of possible configurations. To verify compatibility, use the Server Configurator Tool available at:

<http://serverconfigurator.intel.com/default.aspx>.

Add-in adapter card and peripheral compatibility and stress testing is performed with the latest version of an operating system available at the time of testing. The adapters are divided into categories based on their functionality. All integrated on-board devices are tested by default and are, therefore, not included in the following tables.

---

**Note:** All adapter cards and peripherals were not tested under all operating systems.

---

Any variations to the standard adapter installation process or to expected adapter functionality are documented in the 'Installation Guidelines' section of this document. If there are installation guidelines affecting a particular adapter and operating system combination, they are referenced in the following table. If the installation guidelines are not noted in the following table, then the adapter installed and functioned as expected, using the manufacturer's installation instructions or Intel's best-known methods.

---

**Note:** Adapter cards are normally tested with unused add-in adapters and on-board controller expansion ROMs disabled in the BIOS Setup. Intel recommends that customers disable the option ROM for add-in controllers and/or the on-board controllers when not booting from the controller or needing to use its built-in utilities.

---

### 5.1 External Storage

Manufacturer	Model Name	Model Number	Interface
Adaptec	SANblock	S50	SAS/SATA 3.0Gb
AIC	Xstor	XJ-SA24-316R-B	SAS/SATA 3.0Gb
AIC	Xstor	XJ-SA13-224R-B	SAS/SATA 3.0Gb
Area Data	DNS	1400	SAS/SATA 3.0Gb
Area Data	DNS	1200	SAS/SATA 3.0Gb
Ci Design	SR212	SR212	SAS/SATA 3.0Gb
DELL	MD1000	MD1000	SAS/SATA 3.0Gb
DELL	MD1120	MD1120	SAS/SATA 6.0Gb
ESG	Shea	39R6545	SAS/SATA 3.0Gb
HP	MSA60	MSA60	SAS/SATA 3.0Gb
IBM	EXP3000	EXP3000	SAS/SATA 3.0Gb
LSI	SYM3600-SAS	SYM3600-SAS	SAS/SATA 3.0Gb

LSI	620J	620J	SAS/SATA 6.0Gb
LSI	630J	630J	SAS/SATA 6.0Gb
Promise	vTrak	J310S	SAS/SATA 3.0Gb
Promise	vTrak	J300S	SAS/SATA 3.0Gb
Promise	vTrak	J610S	SAS/SATA 3.0Gb
Promise	vTrak	J630S*	SAS/SATA 6.0Gb
Promise	vTrak	J830S	SAS/SATA 6.0Gb
SuperMicro	836E1	836E1	SAS/SATA 3.0Gb
Xtore	XJSA26-224R-B	XJSA26-224R-B	SAS/SATA 3.0Gb
Xtore	XJ-SA24-316R-D	XJ-SA24-316R-D	SAS/SATA 3.0Gb
Xyratex	RS-1220-E3	RS-1220-E3	SAS/SATA 3.0Gb
OneStor	SP1224S	SP1224S	SAS/SATA 3.0Gb
OneStor	SP1212S	SP1212S	SAS/SATA 3.0Gb
OneStor	SP1424S	SP1424S	SAS/SATA 3.0Gb

Note\*: For J630S, Dual port configures for failover doesn't support with SATA drives; Enclosure LED doesn't show amber blinking when disk drive Predictive Failure is reported by RAID controller firmware and application.

## **5.2 Internal Storage**

None.

## **5.3 Tape and Optical Drives**

None.

## 6. Hard Disk Drives and Solid State Drives

The testing of hard disk drives and solid state drives was performed with the Intel® RAID Controller RS2PI008 and RS2PI008DE by Intel labs, independent test labs, or vendors. The compatibility and stress testing is performed with the latest version of an operating system available at the time of testing. Although a large sample of configurations was tested, not all devices were tested under all operating systems, and not all possible combinations or configurations of third-party devices were tested for inter-compatibility due to the large number of possible configurations. To verify that the device is included for the server board as well as for the Intel® RAID Controller RS2PI008 and RS2PI008DE, use the Server Configurator tool available at:

<http://serverconfigurator.intel.com/default.aspx>.

**Note:** All hard disk drives and solid state drives were not tested under all operating systems.

Any variations to the standard adapter installation process or to the expected adapter functionality are documented in the 'Installation Guidelines' section of this document. If there are installation guidelines affecting a particular adapter and operating system combination, these are referenced in the following table. If the installation guidelines are not noted in the following table, then the adapter installed and functioned as expected, using the manufacturer's installation instructions or Intel's best-known methods.

### 6.1 Hard Disk Drives and Solid State Drives (SSD)

**Note:** The hard disk drives and solid state drives are listed in the following table only if they were attached to the Intel® RAID Controller RS2PI008 and RS2PI008DE during testing.

**Note:** To select hard drives for Intel® Server Chassis and Intel® Server System, please use the Server Configurator tool available at:

<http://serverconfigurator.intel.com/default.aspx>.
