1. System Product Order Codes

1.1 Product Descriptions – Overview

The Intel® Server Boards S2600CP2 and S2600CP4 are mainstream server boards supporting up to two Intel® Xeon Processors, E5-2600. These boards are standard SSI EEB (12"x13") designed for the small/medium business and embedded markets. These will be offered as board-only as well as a fully integrated system in a 4U pedestal chassis. For more details, please review the tables in the subsequent sections.

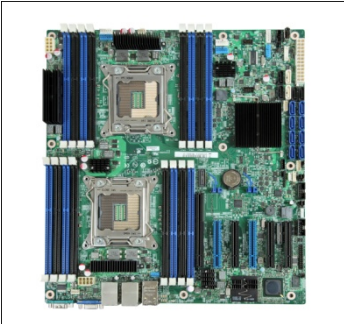

The P4000 Chassis is also sold separately in various configurations. For more information, please refer to the **Intel® Server Chassis P4000 Family Configuration Guide and Spares/Accessories List**.

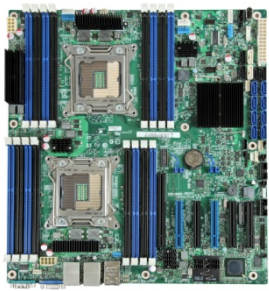

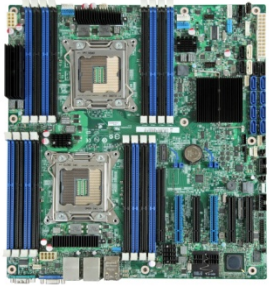

1.2 Summary Table

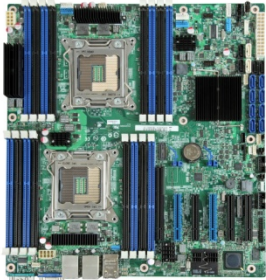

For a quick overview, all configuration options described in this document are summarized in the table below. For more details such as MM numbers and product order codes, please refer to the other sections in this document.

1.4 Available Production System Order Codes for P4000CP Family

The systems described in this section are integrated at the factory. To purchase a chassis separately, please see the Intel® Server Chassis P4000 Family Configuration Guide and Spares/Accessories List document.

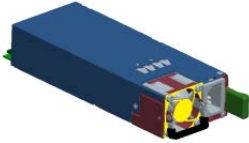

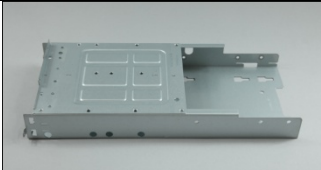

EPSD Romley Chassis and Systems shipped to the US & Canada will contain North American power cords. North American customers no longer need to order skus ending in “NA” to receive power cords on Romley products.
